Tanya

I have a couple comments regarding the NJDEP Comments on the April 2015 Addendum 1 to Data Gap SAP:

Section B. Comments on Addendum 1 to the Data Gaps Sampling and Analysis Plan, General Comment 1.

The soil, sediment, surface water, and pore water data will be included in the Baseline Ecological Risk Assessment (BERA) and compared to NJDEP's Ecological Screening Criteria as part of the assessment of ecological risk. Additional delineation may be required depending on the results of the BERA. This delineation effort may be conducted during the pre-design investigation.

Section C. General RI Concerns, General Comment 1.

Soil data will be compared to NJDEP ecological values in the upcoming BERA. As stated in the response to Comment B.1., additional delineation may be necessary if there are unacceptable risks found at the perimeter of the previous delineation sampling.

[Hello All,](#)

[Attached are NJDEP's comments on the Addendum to the Data Gaps SAP and QAPP. However, the comments are more to the overall RI at the site. Please review and let me know if you have any comments or thoughts on NJDEP's submission. I may also need to contact you this week or early next week individually to discuss some of the comments.](#)

[Please give me a call if you have any questions regarding this email.](#)

[Thanks,](#)
